Narrative for Countywide Model Tax Year: 2018 Appraisal Date: 1/1/2017 Property Type: Retail - Auto Dealer and Mobile Home/Recreational Vehicle Dealer

Updated 6/12/2017 by CM20

#### Area Overview

Countywide models are for properties located throughout Kitsap County, rather than by neighborhood.

#### **Property Type Overview**

Complete auto dealerships include showrooms, office, and parts-service facilities. Dealerships can have between 15% and 55% of the building devoted to showrooms. Showrooms have varying finish qualities, from warehouse to office quality finishes.

Kitsap County has 50 parcels developed as Retail - Auto Dealer, and two parcels developed as Retail - Mobile Home/Recreational Vehicle Dealer.

**Economic Overview:** The downturn in the economy had a significant impact to Retail - Auto Dealer and Mobile Home/Recreational Vehicle Dealer with vacancies appearing across the population stratification. Recovery has been slow, with some of the vacated properties being redeveloped to alternative uses.

#### **Valuation Summary**

#### Approach Used: Income

Analysis and Conclusion Summary: The three approaches to value were considered.

The cost approach was given little consideration in the appraiser's final analysis. Cost approach components such as replacement cost new, effective age, and depreciation are difficult to accurately calculate in a mass appraisal model.

A market/sales comparison approach uses sale prices of comparable properties to calculate value. The market/sales approach was not applied as Kitsap County lacks sufficient, recent sales.

The income approach was selected as the best method for valuing these properties. The data used to develop our current model data was collected from our mail survey, site visits, local sales, national publications, and data supplied for review or appeal.

#### **Model Calibration**

**Preliminary Ratio Analysis:** Analysis of sales resulted in a mean ratio of 90%, a median ratio of 103%, and a coefficient of disperson (COD) of 12.43.

#### Market/Sales Comparison Approach Data and Analysis

**Sales:** Range of Sale Dates: 1/1/2012 to 12/31/2016. A total of 3 local sales, and 0 regional sales, and 0 national sales were used in the sales analysis. Additional information is provided on the sales analysis data sheet.

Kitsap County attempts to review, analyze, and validate via telephone, mail, or in person interviews, all commercial sales within the county for inclusion or exclusion in our market/sales approach.

#### Property type: Retail - Auto Dealer and Mobile Home/Recreational Vehicle Dealer

Market/Sales Rates: Sales ranged from \$72.71 to \$321.82 per square foot.

#### **Income Approach and Data Analysis**

Values were calculated using a triple net (NNN) income model.

Income and expense information was collected from mailed surveys, property representatives, on-site visits, and market research (publications, newsletters, websites, etc.)

Limited income was available for the property type. Alternative uses, such as retail, office, and warehouse were reviewed.

**Rent Data:** The Assessor validated rents from 9.62% of the market. Typical reported rents had a range of \$6.85 to \$19.80. We selected \$4.36 to \$18.84 for our model.

Vacancy Data: Typical reported vacancy had a range of 0% to 0%. We selected 15% to 20% for our model.

Expense Data: Typical reported expense had a range of 0% to 31%. We selected 6% to 6% for our model.

Capitalization Rate (Cap) Data: Typical sale cap rates ranged from 0% to 0%. We selected 7.5% to 8.25% for our model.

Cap rates were adopted from retail.

**Income Model Value Range:** The income approach calculates a range of values from \$42.23 to \$188.9 per square foot.

**Final Ratio Analysis:** Analysis of sales resulted in a mean ratio of 89%, a median ratio of 103%, and a coefficient of disperson (COD) of 13.68.
