## Documentation for Countywide Model

Tax Year: 2026 Appraisal Date: 1/1/2025

Property Type: Land Leases for Cell, Espresso, ATM, & Billboard Sites

Updated 5/28/2025 by

### Area Overview

Countywide models are for properties located throughout Kitsap County, rather than by neighborhood.

Kitsap County has 13 ATMs on 10 parcels, 51 Billboard units on 24 parcels (a billboard unit is one side, a two sided billboard counts as 2), 130 Cell Sites on 106 parcels, and 50 Espresso sites on 50 parcels. The valuation attributed to these sites is the capitalized value of the land lease and does not include any improvements. Improvements are carried as personal property. The only exception would be espresso stands that have been constructed as permanent structures. Those buildings are valued as real property classified as a Snack Bar according to Marshall Valuation service using a cost approach, or valued as a Quick Service Restaurant/Fast Food on the income approach.

### Property Type Overview

**Land to Building Ratio:** The national land to building ratio for this property type is n/a. The countywide land to building ratio for this property type is: n/a.

The land to building ratio is used to determine excess or surplus land. Review of zoning requirements such as total lot coverage or parking requirements, as well as topography and easements, must also be considered before calculating value for this land.

**Economic Overview:** Vacancy for land leases are very low and the income is stable, making these income producing properties very good investments. The majority of land leases are associated with other income producing properties like retail, mini-warehouse, etc.

### Valuation Summary

**Approach Used:** Income

**Analysis and Conclusion Summary:** The three approaches to value were considered.

The cost approach was given little consideration in the appraiser's final analysis. Cost approach components such as replacement cost new, effective age, and depreciation are difficult to accurately calculate in a mass appraisal model.

A market/sales comparison approach uses sale prices of comparable properties to calculate value. The market/sales approach was not applied as Kitsap County lacks sufficient, recent sales.

The income approach was selected as the best method for valuing these properties. The data used to develop our current model data was collected from our mail survey, site visits, local sales, national publications, and data supplied for review or appeal.

### Model Calibration

**Preliminary Ratio Analysis:** Analysis of 0 sales resulted in a mean ratio of 0%, a median ratio of 0%, and a coefficient of dispersion (COD) of 0.

### Market/Sales Comparison Approach Data and Analysis

**Sales:** Range of Sale Dates: to . A total of 0 local sales, and 0 regional sales, and 0 national sales

## **Property type: Land Leases for Cell, Espresso, ATM, & Billboard Sites (continued)**

were used in the sales analysis. Additional information is provided on the sales analysis data sheet.

Kitsap County attempts to review, analyze, and validate via telephone, mail, or in person interviews, all commercial sales within the county for inclusion or exclusion in our market/sales approach.

**Market/Sales Rates:** Sales ranged from \$0 to \$0 per

### **Income Approach and Data Analysis**

Values were calculated using a triple net (NNN) income model.

Income and expense information was collected from mailed surveys, property representatives, on-site visits, and market research (publications, newsletters, websites, etc.)

**Rent Data:** The Assessor validated rents from 35% of the market. Typical reported rents had a range of \$1,350 to \$60,000. We selected \$375 to \$20,000 for our model.

**Vacancy Data:** Typical reported vacancy had a range of 0% to 0%. We selected 0% to 0% for our model.

**Expense Data:** Typical reported expense had a range of 0% to 0%. We selected 0% to 0% for our model.

**Capitalization Rate (Cap) Data:** Typical sale cap rates ranged from 0% to 0%. We selected 8% to 8% for our model.

**Income Model Value Range:** The income approach calculates a range of values from \$4690 to \$250000 per

**Final Ratio Analysis:** Analysis of 0 sales resulted in a mean ratio of 0%, a median ratio of 0%, and a coefficient of dispersion (COD) of 0.
