

Kitsap County Assessor

Documentation for Countywide Model

Tax Year: 2027 Appraisal Date: 1/1/2026

Property Type: Mini Warehouse

Updated 5/7/2026 by CM32

Area Overview

Countywide models are for properties located throughout Kitsap County, rather than by neighborhood.

This property type was physically inspected for the 2026 tax year.

Kitsap County has 78 parcels developed with mini-warehouse as the primary occupancy. Additional parcels contain mini-warehouse along with other occupancies.

Property Type Overview

Mini-warehouse, mini storage, or self-storage facilities rent storage space to individuals or businesses. Units come heated or unheated, and in a variety of sizes but typically range from 25 to 600 square feet. Amenities typically include a fenced perimeter, gated access, security guards, security cameras, and onsite managers. Additional covered and uncovered storage is available for cars, boats, travel trailers, and motor homes.

Land to Building Ratio: The national land to building ratio for this property type is 2-3:1. The countywide land to building ratio for this property type is: 1,000 sf:1 unit.

The land to building ratio is used to determine excess or surplus land. Review of zoning requirements such as total lot coverage or parking requirements, as well as topography and easements, must also be considered before calculating value for this land.

Economic Overview: Economic conditions are favorable for this property type with increasing rents, limited vacancy, and new projects being constructed.

Valuation Summary

Approach Used: Income

Analysis and Conclusion Summary: The three approaches to value were considered.

The cost approach was given little consideration in the appraiser's final analysis. Cost approach components such as replacement cost new, effective age, and depreciation are difficult to accurately calculate in a mass appraisal model.

A market/sales comparison approach uses sale prices of comparable properties to calculate value. The market/sales approach was not applied as Kitsap County lacks sufficient, recent sales.

The income approach was selected as the best method for valuing these properties. The data used to develop our current model data was collected from our mail survey, site visits, local sales, national publications, and data supplied for review or appeal.

The income approach uses the net leasable area in the calculation. Hallways, offices, restrooms, etc. are considered necessary for the operation of the storage facility and their value is carried in the income generated from the storage units.

Model Calibration

Preliminary Ratio Analysis: Analysis of 6 sales resulted in a mean ratio of 98%, a median ratio of 103%, and a coefficient of dispersion (COD) of 13.96.

Property type: Mini Warehouse (continued)

Market/Sales Comparison Approach Data and Analysis

Sales: Range of Sale Dates: 1/1/2021 to 12/31/2025. A total of 6 local sales, and 0 regional sales, and 0 national sales were used in the sales analysis. Additional information is provided on the sales analysis data sheet.

Kitsap County attempts to review, analyze, and validate via telephone, mail, or in person interviews, all commercial sales within the county for inclusion or exclusion in our market/sales approach.

Market/Sales Rates: Sales ranged from \$0 to \$0 per unit.

Income Approach and Data Analysis

Values were calculated using a full service income model.

Income and expense information was collected from mailed surveys, property representatives, on-site visits, and market research (publications, newsletters, websites, etc.)

Rent Data: The Assessor validated rents from 0% of the market. Typical reported rents had a range of \$240 to \$5676. We selected \$300 to \$11418 for our model.

Vacancy Data: Typical reported vacancy had a range of 0% to 50%. We selected 10% to 10% for our model.

Expense Data: Typical reported expense had a range of 0% to 39%. We selected 40% to 40% for our model.

Capitalization Rate (Cap) Data: Typical sale cap rates ranged from 2.86% to 7.19%. We selected 6.25% to 7% for our model.

Cap rates were sourced from local and regional sales.

Income Model Value Range: The income approach calculates a range of values from \$0 to \$0 per unit.

Final Ratio Analysis: Analysis of 6 sales resulted in a mean ratio of 92%, a median ratio of 97%, and a coefficient of dispersion (COD) of 15.64.
