

## **Kitsap County Assessor**

Documentation for Area 5 - Bremerton & Central Kitsap East Tax Year: 2026 Appraisal Date: 1/1/2025 Property Type: Parking Lots and Parking Garages Updated 5/28/2025 by CM20

#### Area Overview

Bremerton includes both East and West and Tracyton, Illahee, Manette, West Hills, Kitsap Lake, Charleston Beach.

This property type was physically inspected for the 2022 tax year.

Area 5 has 160 parcels developed with parking garages and/or parking lots. There are 6 garages and 154 parking lots. Lots and garages owned by the City of Bremerton are not included in this unit count.

## Property Type Overview

A parking lot is land cleared and developed with gravel or asphalt and is intended for the parking of vehicles on a commercial basis. A parking garage is a building designed for the parking of vehicles on multiple floors. Some parking garages are incorporated into retail or office structures. Rent is paid by space on a daily or monthly basis.

Pay parking lots and parking garages valued on an income approach for Area 5 are located in the following four neighborhoods: 8100501 Downtown Bremerton, 8100502 West Bremerton, 8100510 Callow, and 9100541 West Bremerton Uplands. Parking lots in all other Area 5 neighborhoods, or parking lots that are not designated pay parking lots, are valued using a cost approach.

**Land to Building Ratio:** The national land to building ratio for this property type is n/a. The countywide land to building ratio for this property type is: n/a.

The land to building ratio is used to determine excess or surplus land. Review of zoning requirements such as total lot coverage or parking requirements, as well as topography and easements, must also be considered before calculating value for this land.

**Economic Overview:** The construction of parking garages inside the shipyard has had a negative impact on the vacancy associated with commercial parking lots located on the periphery of the downtown core.

### Valuation Summary

Approach Used: Income

Analysis and Conclusion Summary: The three approaches to value were considered.

The cost approach was given little consideration in the appraiser's final analysis. Cost approach components such as replacement cost new, effective age, and depreciation are difficult to accurately calculate in a mass appraisal model.

A market/sales comparison approach uses sale prices of comparable properties to calculate value. The market/sales approach was not applied as Kitsap County lacks sufficient, recent sales.

The income approach was selected as the best method for valuing these properties. The data used to develop our current model data was collected from our mail survey, site visits, local sales, national publications, and data supplied for review or appeal.

#### Model Calibration

## Property type: Parking Lots and Parking Garages (continued)

**Preliminary Ratio Analysis:** Analysis of 0 sales resulted in a mean ratio of 0%, a median ratio of 0%, and a coefficient of dispersion (COD) of 0.

#### Market/Sales Comparison Approach Data and Analysis

**Sales:** Range of Sale Dates: to . A total of 0 local sales, and 0 regional sales, and 0 national sales were used in the sales analysis. Additional information is provided on the sales analysis data sheet.

Kitsap County attempts to review, analyze, and validate via telephone, mail, or in person interviews, all commercial sales within the county for inclusion or exclusion in our market/sales approach.

Market/Sales Rates: Sales ranged from \$0 to \$0 per space.

#### Income Approach and Data Analysis

Values were calculated using a full service income model.

Income and expense information was collected from mailed surveys, property representatives, on-site visits, and market research (publications, newsletters, websites, etc.)

**Rent Data:** The Assessor validated rents from 90% of the market. Typical reported rents had a range of \$960 to \$2,280. We selected \$1,080 to \$2,150 for our model.

**Vacancy Data:** Typical reported vacancy had a range of 0% to 0%. We selected 35% to 85% for our model.

**Expense Data:** Typical reported expense had a range of 0% to 0%. We selected 25% to 35% for our model.

**Capitalization Rate (Cap) Data:** Typical sale cap rates ranged from 0% to 0%. We selected 8% to 8% for our model.

**Income Model Value Range:** The income approach calculates a range of values from \$1,418 to \$12,188 per space.

**Final Ratio Analysis:** Analysis of 0 sales resulted in a mean ratio of 0%, a median ratio of 0%, and a coefficient of dispersion (COD) of 0.
