

## Kitsap County Assessor

### Documentation for Countywide Model

Tax Year: 2026 Appraisal Date: 1/1/2025

Property Type: Countywide Retail - Supermarket and Big Box - Medium

Updated 5/19/2025 by CM10

### Area Overview

Countywide models are for properties located throughout Kitsap County, rather than by neighborhood.

### Property Type Overview

Big Box Medium and Supermarkets are large single tenant retail stores between approximately 40,000 square feet to 75,000 square feet per tenant occupancy. These stores will include anchor as well as secondary or junior anchor stores and supermarkets. This property type can be part of a shopping center or a freestanding building.

Kitsap County has a total of 18 stores, five Big Box Medium, and 13 supermarkets.

Large single tenant retail buildings typically remain occupied for a significant portion of the buildings life and are stable through various economic conditions. If a building become vacant, however, it often remains vacant for several years.

**Land to Building Ratio:** The national land to building ratio for this property type is 3-4:1. The countywide land to building ratio for this property type is: 3.7:1.

The land to building ratio is used to determine excess or surplus land. Review of zoning requirements such as total lot coverage or parking requirements, as well as topography and easements, must also be considered before calculating value for this land.

### **Economic Overview:**

### Valuation Summary

**Approach Used:** Income

**Analysis and Conclusion Summary:** The three approaches to value were considered.

The cost approach was given little consideration in the appraiser's final analysis. Cost approach components such as replacement cost new, effective age, and depreciation are difficult to accurately calculate in a mass appraisal model.

A market/sales comparison approach uses sale prices of comparable properties to calculate value. The market/sales approach was not applied as Kitsap County lacks sufficient, recent sales.

The income approach was selected as the best method for valuing these properties. The data used to develop our current model data was collected from our mail survey, site visits, local sales, national publications, and data supplied for review or appeal.

### Model Calibration

**Preliminary Ratio Analysis:** Analysis of 1 sales resulted in a mean ratio of 105%, a median ratio of 105%, and a coefficient of dispersion (COD) of 0.

### Market/Sales Comparison Approach Data and Analysis

**Sales:** Range of Sale Dates: 1/1/2020 to 12/31/2024. A total of 1 local sales, and 0 regional sales, and 0 national sales were used in the sales analysis. Additional information is provided on the sales analysis

## **Property type: Countywide Retail - Supermarket and Big Box - Medium (continued)**

data sheet.

Kitsap County attempts to review, analyze, and validate via telephone, mail, or in person interviews, all commercial sales within the county for inclusion or exclusion in our market/sales approach.

**Market/Sales Rates:** Sales ranged from \$140.13 to \$140.13 per square foot.

### **Income Approach and Data Analysis**

Values were calculated using a triple net (NNN) income model.

Income and expense information was collected from mailed surveys, property representatives, on-site visits, and market research (publications, newsletters, websites, etc.)

**Rent Data:** The Assessor validated rents from 0% of the market. Typical reported rents had a range of \$ to \$. We selected \$4.32 to \$11.27 for our model.

**Vacancy Data:** Typical reported vacancy had a range of 0% to 0%. We selected 10% to 10% for our model.

**Expense Data:** Typical reported expense had a range of 0% to 0%. We selected 6% to 6% for our model.

**Capitalization Rate (Cap) Data:** Typical sale cap rates ranged from 0% to 0%. We selected 6.5% to 7.5% for our model.

**Income Model Value Range:** The income approach calculates a range of values from \$48.73 to \$146.68 per square foot.

**Final Ratio Analysis:** Analysis of 1 sales resulted in a mean ratio of 105%, a median ratio of 105%, and a coefficient of dispersion (COD) of 0.
