RE: Short Subdivision #7448
Permit No. 19-04155
Tax Account No. 212402-1-084-2008

Dear Applicant:

This is to inform you that the above-referenced short subdivision has been granted **preliminary** approval.

This decision is in compliance with Kitsap County Code 21.04 Land Use and Development Procedures. All applicable criteria have been met for preliminary short subdivision in accordance with Kitsap County Code Title 16.48 Short Subdivision.

The Department has further determined that the land segregation as it is presented in the preliminary short subdivision, received 09/26/2019 by the Department of Community Development, conforms or will conform subject to conditions set forth in this letter, to the following:

1. Kitsap County Code Title 17 Zoning;
2. Kitsap County Code Title 12 Storm Water Drainage;
3. Kitsap County Comprehensive Plan and subarea plans;
4. Kitsap County Critical Areas Ordinance;
5. And all other elements of the Kitsap County Code that pertain to this land segregation.

Approval is subject to the following conditions:

LAND USE

1. Adhere to all elements and requirements set forth in Kitsap County Code 16.48.
2. The following condition shall be added to the face of the final short subdivision: Building permits issued on a lot in this short subdivision may be subject to impact fees pursuant to Kitsap County Code.
3. The names of the roads in this land segregation shall be approved by Community Development prior to final subdivision approval.
4. All required permits shall be obtained prior to commencement of land clearing, construction and/or occupancy.

5. The decision set forth herein is based upon representations made and exhibits contained in the project application (19-04155). Any change(s) or deviation(s) in such plans, proposals, or conditions of approval imposed shall be subject to further review and approval of the County and potentially the Hearing Examiner.
6. The authorization granted herein is subject to all applicable federal, state, and local laws, regulations, and ordinances. Compliance with such laws, regulations, and ordinances is a condition to the approvals granted and is a continuing requirement of such approvals. By accepting this/these approvals, the applicant represents that the development and activities allowed will comply with such laws, regulations, and ordinances. If, during the term of the approval granted, the development and activities permitted do not comply with such laws, regulations, or ordinances, the applicant agrees to promptly bring such development or activities into compliance.
7. The following condition shall be added to the face of the plat: Building permits shall comply with the standards of the Manchester Village Low Residential (MVLRL) zone. The maximum impervious surface coverage is 40% for residential properties greater than or equal to 0.51 acres.
8. The following condition shall be added to face of the Short Plat: "All native vegetation buffers shall be maintained as depicted on the plat. No cutting or clearing shall occur within the perimeter buffer, except the minimum vegetation needed to be removed for driveway access and the turn-around. Hazardous trees within the buffers may be removed upon review and approval of Kitsap County. Replanting of removed trees may be required."

SURVEY

1. At the time of submittal of the final short subdivision a title certificate, current to within 30 days, is required. Please note or delineate on the face of the Final short subdivision all pertinent special exception items in Schedule "B" of the title certificate.
2. A Road Maintenance Agreement will be required for the access easements shown on the face of the plat. This may be in the form of a note on the face of the Final Plat that addresses ownership and maintenance responsibilities of the access easement, or in the form of a Road Maintenance Agreement document to be recorded separately and referenced on the face of the Final Plat.
3. A Final Short/Large Lot/Subdivision Plat shall be prepared by a licensed Land Surveyor in compliance with KCC Title 16.

STORMWATER

1. Construction plans and profiles for all roads, storm drainage facilities and appurtenances prepared by the developer's engineer shall be submitted to Kitsap County for review and acceptance. No construction shall be started prior to said plan acceptance.

2. Approval of the preliminary plat shall not be construed to mean approval of the total number of lots or configuration of the lots and tracts. These parameters may be required to be revised for the final design to meet all requirements of Kitsap County Code Titles 11 and 12.
3. The information provided demonstrates this proposal is a Large Project as defined in **Kitsap County Code Title 12**, and as such will require a Full Drainage Site Development Activity Permit (**SDAP**) from Development Services and Engineering.
4. The SDAP plans shall include design for the relocated bioretention trench and associated facilities adequate to provide, at minimum, the same water quantity and water quality functions as the system previously approved under SDAP 17-03982.
5. The required SDAP shall be completed and obtain approval of all required inspections prior to recording the Final Short Plat. In the event this project does not continue to Final Short Plat recording, prior to issuance of any further permits, the applicant shall complete the work authorized by the SDAP and obtain approval of all required inspections.
6. Stormwater quantity control, quality treatment, and erosion and sedimentation control shall be designed in accordance with **Kitsap County Code Title 12** effective at the time the Preliminary Short Subdivision application was deemed complete, September 25, 2019. The submittal documents shall be prepared by a civil engineer licensed in the State of Washington. The fees and submittal requirements shall be in accordance with Kitsap County Ordinances in effect at the time of SDAP application.
7. The site plan indicates that greater than 1 acre will be disturbed during construction. This threshold requires a National Pollutant Discharge Elimination System (NPDES) Stormwater Construction permit from the State Department of Ecology. More information about this permit can be found at: <http://www.ecy.wa.gov/programs/wq/stormwater/construction/> or by calling Josh Klimek at 360-407-7451, email joshklimek@ecy.wa.gov. This permit is required prior to issuance of the SDAP.
8. The Washington State Department of Ecology (Ecology) may require registration of the infiltration trench as a Underground Injection Control (UIC) well in accordance with the Underground Injection Control Program (Chapter 173-218 WAC). The applicant shall contact Ecology to determine if the facility is regulated under the UIC program.
9. If a significant quantity of grading material will be exported from the site, prior to issuing the SDAP an approved fill site(s) must be identified.
 - Any fill site receiving 150 cubic yards or more of material must obtain an SDAP.
 - Fill sites receiving 5,000 cubic yards or more, or located within a critical area, must have an engineered SDAP.

- For any fill site receiving less than 150 cubic yards, the SDAP holder shall submit to Kitsap County Department of Community Development load slips indicating the location of the receiving site and the quantity of material received by said site.
10. If a significant quantity of grading material will be exported from/imported to the site (typically, this means five or more trucks leaving the site per hour), a vehicle wheel wash must be included as an element of the siltation erosion control plan.
 11. The design of the infiltration facilities will be accordance with Vol. II, Chapter 9 of the Kitsap County Stormwater Design Manual.
 12. The infiltration facilities shall remain off line until the drainage areas are stabilized and the water quality treatment facility is adequately established. Temporary erosion and sedimentation ponds shall not be located over infiltration facilities. In addition, retention ponds shall not be utilized as temporary erosion and sedimentation control ponds.
 13. During the construction of the proposed infiltration facilities, the Project Engineer shall provide an inspection to verify that the facilities are installed in accordance with the design documents and that actual soil conditions encountered meet the design assumptions. The Project Engineer shall submit the inspection report properly stamped and sealed with a professional engineer's stamp to Development Services and Engineering.
 14. All lots shall use individual on-site infiltration systems. Before the issuance of building permits and/or occupancy permits, the property owner shall submit to the Department of Community Development for review, a sketch showing the design and location of a stormwater infiltration facility for the distribution of surface water runoff. Maintenance of these systems will be the responsibility of the homeowner.
 15. The impervious area per lot accounted for in the overall drainage facilities installed shall be indicated on the face of the Final Short Plat. Additional impervious surfaces created on an individual lot beyond the amount accounted for in the overall drainage facilities shall be mitigated in accordance with Kitsap County Code Title 12.
 16. The following condition shall be added to the face of the Final Short Plat: At the time of building permit application and/or any additional road construction or site work, the property owner shall comply with Kitsap County Code Title 12 effective at the time the Preliminary Short Subdivision Application was deemed complete, September 25, 2019.
 17. The following condition shall be added to the face of the Final Short Plat: At the time of submittal of a building permit for any lot within this plat, soil amendment is required for all disturbed areas not covered by hard surface.
 18. If the project proposal is modified from that shown on the submitted site plan accepted for review August 4, 2020, Development Services and Engineering will require additional review and potentially new conditions.

TRAFFIC

1. At the time of building permit application, submit an Application for Concurrency Test (KCPW Form 1601) as required by Chapter 20.04.030, Transportation Concurrency, of the Kitsap County Code. The KCPW 1601 form reserves road capacity for the project.
2. The property owners within the plat shall be responsible for maintenance of all landscaping within the existing and proposed right-of-way including any structures other than roadway, storm drainage facilities, and traffic signage. Maintenance shall include, but not be limited to, mowing of lawn areas. A note to this effect shall appear on the face of the final plat map. In addition, Development Services and Engineering reserves the right to require that covenants be recorded to address special maintenance requirements depending on final design.
3. At the time of building permit application, submit plans for construction of the road approach between the edge of existing pavement and the right-of-way line at all intersections with county rights-of-way. Approaches shall be designed in accordance with the Kitsap County Road Standards as established in Chapter 11.22 of the Kitsap County Code. Existing approaches may need to be improved to meet current standards.
4. This project includes the construction of rock walls or other retaining facilities; if they either exceed four feet in height or sustain a surcharge, a separate building permit with an engineered design is required. This note shall be placed on the face of the final construction drawings.
5. Rock and retaining walls shall meet all applicable setback requirements of Vol. II, Chapter 9 of the Kitsap County Stormwater Design Manual.
6. Any work within the County right-of-way shall require a Public Works permit and possibly a maintenance or performance bond. This application to perform work in the right-of-way shall be submitted as part of the Site Development Activity Permit process. The need for and scope of bonding will be determined at that time.

FIRE MARSHAL

1. 20ft access width to be maintained thru approved turnaround dimensions. Turnaround to be marked as "Fire Lane - No Parking". Painted curbs or signs acceptable, to be noted on SDAP. For questions contact DFM Greg Gentile at ggentile@co.kitsap.wa.us

HEALTH DISTRICT

1. Building Site Applications will be required prior to building permit issuance.

19-04155 Lamothe Preliminary Approval
October 25, 2021

Preliminary approval of this short subdivision will automatically expire five (5) years from the date of this letter. However, upon written request to the Department of Community Development by the original applicant and the current owner(s) of the subject property, at least thirty (30) days prior to expiration, a six (6) month extension may be granted.

Preparation of the final short subdivision shall be done in accordance with Kitsap County Code 16.48. All applicable conditions of preliminary approval must be addressed with the submittal of final short subdivision application. Submittals that do not address all conditions will be considered incomplete and returned without review. All of the above relevant conditions and any/all building setbacks and buffers established as conditions of approval must appear on the final short subdivision.

If you have any questions or comments regarding this letter, please feel free to contact **Peggy Bakalarski** for Survey matters; **Candy Vickery** for Stormwater and Traffic matters; **Steve Heacock** for Land Use matters/Environmental matters; **Greg Gentile** for Fire Marshal matters; all of whom can be reached at (360) 337-5777. Please contact **Kerrie Yanda** for Health District matters at (360) 337-5285.

Sincerely,

10/25/2021

Peggy Bakalarski, Project Lead
