

# NEWS AND INFORMATION

A Marine Waterfront Landowner Resource

June 30, 2020

## Geologist Site Visit

Save the Date: July 24th and 25th 2020

Are you a Marine Waterfront Property Owner in Kitsap County? Do you have a bulkhead that you have contemplated removing, but have concerns? Consider signing up for this free event to get your questions answered about the feasibility of removal, possible erosion, and alternative options for your shoreline!

**About the Site Visit:** Shore Friendly Kitsap will be partnering with Coastal Geologic Services Inc. on July 24th and 25th, to provide free site assessments by professional geologists. This opportunity is for participants that are interested in removing their bulkhead and moving towards a naturalized shoreline.

**Why Get a Site Assessment:** A site assessment is a great way to learn more about your property, get your questions answered, and prepare for the future. This opportunity is a great way to gauge your erosion risk and point you to the resources you need in order to get your shoreline restoration project started.

### How to Sign Up for a Site Visit

In order to sign up, please visit our News and Events page on our website. The direct link can be found at the bottom of this newsletter. On the News and Events page you will find "Request A Site Visit". That will take you to the required questionnaire that needs to be filled out.

Please note, we have limited spots available, so make sure to sign up at your earliest convenience!

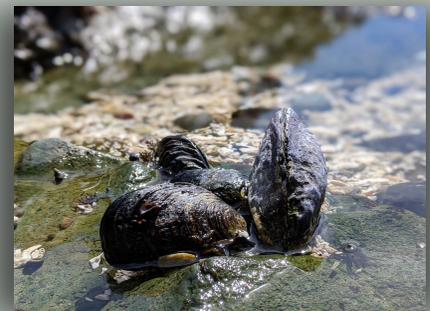

### In Other News:

We now have our own Facebook group! Give us a follow to get the most recent updates and information about our program and upcoming offerings. We have some fun plans in the works and our group is the easiest way to stay informed.
