

A RESOLUTION TO UPDATE COMMUNITY DEVELOPMENT FEES FOR BUILDING & CONSTRUCTION FEES (TITLE 14) AND LAND USE & DEVELOPMENT FEES (TITLE 21)

WHEREAS, the Department of Community Development (DCD) became a Special Revenue Fund in January 2008; and,

WHEREAS, subsequent fee updates have been implemented at least annually since 2010; and,

WHEREAS, the International Code Council (ICC) Building Valuation Data Table (February 2022 edition) reflects an increase of 10.94% "average" construction costs per square foot ICC BVD – February 2023 Publication; and,

WHEREAS, the ICC Building Valuation Data Table (February 2023 edition) is the approved source in determining building and construction permit fees; and,

WHEREAS, the Permit Fee Multiplier will increase from 1.94% to 2.04% for residential projects and commercial mechanical / plumbing elements; and,

WHEREAS, based on the 2023 analysis, the department recommends updating certain land use and development fees as identified in the 2024 Community Development Fee Schedule; and,

WHEREAS, the Board of County Commissioners held a public hearing on December 4, 2023 concerning the adoption of the updated Community Development Fee Schedule to be effective January 1, 2024;

NOW THEREFORE BE IT RESOLVED by the Board of County Commissioners that the attached Community Development 2024 Fee Schedule is hereby adopted.

ADOPTED this 11 day of Dec, 2023.

FEE SCHEDULE COMMUNITY DEVELOPMENT

Residential and Commercial Building Permit Fees and Fire Code Construction Permits are determined by the building value or value of the improvement as calculated by either using the square footage of the project multiplied by the square foot construction cost, as compiled by the International Code Council (ICC) and published by the Building Safety Journal magazine annually, or the value of the improvement. For improvements not covered in the ICC table, applicants may be asked to provide the valuation for those projects (i.e., replacement furnaces, decks, or other components of a construction project). That value will then be multiplied by a Permit Fee Multiplier as determined by the type of construction. For single family residences, the Permit Fee may include all improvements of the structure, i.e., mechanical and/or plumbing permits, fixture fees, and plan review. For commercial projects, the Permit Fee Multiplier includes the main structure only; supporting elements such as mechanical and plumbing, etc. will have a separate fee based on the value of improvement. The Director will establish a separate policy regarding the timeframe for permits and extensions.

Mechanical and Plumbing Fees are included in the building permit fee for new single-family residences. For all other permit types, mechanical and plumbing fees are based on valuation with a minimum fee of \$75.

Land use and development fees are charged a flat fee based on the average processing time to review/process the application. The flat fee includes two iterations of plans review (first submittal comments and review of second submittal comments), as well as intake and closeout of the application. Any additional review beyond two iterations of plans review will be charged monthly at the approved hourly rate and must be paid in full prior to issuance. No applicant will be charged additional hours without a review by the appropriate manager to ensure the hours are valid. Inspections may or may not be included in the flat fee. Inspections that are charged an hourly rate as identified in the Community Development Fee Schedule, will be charged monthly, and must be paid in full prior to final inspection. DCD has established and published adjudication procedures for applicants who disagree with assessed fees higher than the base or flat fee.

A non-refundable **Base Application Fee** of \$90 is collected for each permit application unless otherwise noted.

A non-refundable **Technology Surcharge** of 3% is collected for each permit application, which will be maintained in a restricted account for technology initiatives only.

Other Agency Fees are included for those agencies that have authorized the Department to collect specific fees on behalf of their agency. These fees include impact fees for local schools, roads and parks, and the Washington State Building Code Council surcharge.
