

Kitsap County Public Works

Caring about your every day

SOLID WASTE

- Recycling Education
- Reduce Waste
- Safe Disposal

SEWER

- Sewage Collection
- Sewage Treatment
- Water Reuse

STORMWATER

- Reduce Flooding
- Prevent Pollution
- Restore Fish Habitat

ROADS

- Preserve Roadways
- Efficient Traffic
- Improve Safety and Capacity

Sewer Utility Division

2025 Standards for Sanitary Sewer Construction Update – Planning Commission Briefing

Staff Contact: Anthony Burgess, Capital Projects Manager

Kitsap County Department of Public Works

What are the Standards for Sanitary Sewer Construction?

- Sewer Standards build on other established requirements published by WSDOT and Department of Ecology and modify these requirements as necessary to suit Kitsap County Public Works Division needs.
- Sewer Standards dictate the means and methods for sanitary sewer construction for all development types in Kitsap County Sewer Service areas.
 - Requirements for Gravity lines and structures, pressurized sewer lines, Developer Built lift stations, etc.
 - Includes policies for easements, dedication of infrastructure, designation of the Public-Private transition point and others.
- Used as a resource for consistent expectations for all developers and design professionals.

Why The Update?

- PW Sewer has not had a comprehensive update to their standards in many many years.
- Requirements are not easily understood and difficult to locate.
- Some requirements are seen as barriers to development.
- Some requirements are not consistent with current construction practices.
- Several Policy Changes have occurred and have not been reflected in the standards.

An update in (2) parts:

- Priority 1: Jurisdiction means and methods.
 - These are industry specific requirements that are not meant to be open for exhaustive public deliberation.
 - These means and methods directly correlate to system operation, maintenance safety, and ensure longevity of public infrastructure.
 - There is a great deal of information within the document that must be updated as written
- Priority 2: Focusing on Development Issues
 - These are new or expanded ideas which are discretionary and change jurisdiction to jurisdiction.
 - These specific development regulations include policies, or other allowances that are not outright covered in WSDOT or Ecology guidance documents.
 - Each of these topics will be discussed within the upcoming work study.
 - These standards have been shared with and presented to the Kitsap Builders Association in hopes of receiving constructive commentary prior to our 1st workshop.
