ATTACHMENT B-2: STATEMENT OF WORK

Agape Unlimited – Co-Occurring Services

Background

In 2005, Washington State approved legislation allowing counties to raise their local sales tax by one-tenth of one percent to augment state funding of mental health and chemical dependency programs and services. In September 2013, the Kitsap County Board of Commissioners passed a resolution authorizing a sales and use tax for Mental Health, Chemical Dependency and Therapeutic Court Programs. The goal of this tax is to prevent and reduce the impacts of disabling chemical dependency and mental illness by creating and investing in effective, data-driven programs for a continuum of recovery-oriented systems of care.

Project Description

This project will provide behavioral health services within the Outpatient services level of the continuum of care and addresses the following strategic goals:

- Reduce the incidence and severity of chemical dependency and/or mental health disorders in adults and youth.

Funding will provide the AIMS (Agape Integrated Mental Health Services) program, which is a partnership between Agape Unlimited and Peninsula Community Health Services that will provide co-occurring disorder services to 18 youth and adults in one location, preventing barriers that prevent engagement into services or program failure.

Project Activities

The Contractor will partner with Peninsula Community Health Services (PCHS) to design a program that will provide a collaboration of behavioral health services. This program will provide a Licensed Mental Health Practitioner (LMHP) and part-time Patient Care Coordinator on site at Agape in Bremerton. This partnership will allow the AIMS (Agape Integrated Mental Health Services) program to quickly get participants who are suitable screened for possible co-occurring disorders, assessed and enrolled into co-occurring services at one location. The AIMS program also has the unique ability to get participants enrolled into primary care and dental health with the assistance of the Patient Care Coordinator.

The AIMS team will screen all participants by utilizing the Patient Health Questionnaire (PHQ2, PHQ9), Generalized Anxiety Disorder Screening (GAD), Post-Traumatic Stress Disorder Checklist (PCL) and Mood Disorder Questionnaire (MDQ) and other screening tools to determine the participant's level of functioning and need for assessment. These screening tools will help the AIMS team determine if an assessment is warranted and proceed forward with the assessment if appropriate. The assessment will determine the diagnosis and level of care needed. The assessment is the platform that will enable the AIMS team to develop care plans and or facilitate referrals to other service providers.

Participants will also receive substance use disorder treatment services and depending on the assessment outcome other services such as: Intensive Outpatient (IOP level 2.1), Outpatient (OP level 1), assessment of needs, placement/referral services, monthly face-to-face contact, goal planning and problem solving, job readiness training, education referral, living skills facilitation, parenting skills training, and permanent housing referrals. Treatment services are tailored to the individual and their needs.

Project Design

The Contractor will provide a large range of programs, support and treatment services that focus on the whole person and individuals' unique needs including:

- Motivational interviewing to help participants resolve ambivalent feelings and uncertainties to help guide them to find their internal motivation to change their behavior.
- Cognitive Behavioral Therapy is utilized to help participants begin making behavior changes and thought processes that promote pro-social living skills.
- Rational Emotive Behavior Therapy focuses on resolving current problems and allows them to empower themselves through problem solving and behavior changes.
- Moral Recognition Therapy (MRT), a cognitive-behavioral program which changes ways of thinking to promote pro-social behavior, works on moral reasoning, decision making and consequences.
- Dialectical behavioral therapy (DBT) is a type of cognitive behavioral therapy. Cognitive behavioral therapy tries to identify and change negative thinking patterns and pushes for positive behavioral changes. DBT may be used to treat suicidal and other self-destructive behaviors.
- Problem Solving Treatment (PST), also known as Primary Care (PST-PC), teaches and empowers patients to solve the here-and-now problems contributing to their depression and helps increase self-efficacy.
- Assertive Community Treatment (ACT) is an evidence-based practice that improves outcomes for people with severe mental illness who are most at-risk of psychiatric crisis and hospitalization and involvement in the criminal justice system.

Project Outcomes and Measurements

The contractor will participate in the Evaluation Plan for Treatment Sales Tax Programs. Programs or services implemented under the Treatment Sales Tax are monitored by the Human Services Department and reviewed by the Community Advisory Committee. - Common measures (to be identified by the Citizens Advisory Committee and Kitsap Public Health District staff that all programs must report on).

Data will be collected to monitor the following goals and objectives identified by the Contractor:

Goal #1: To provide integrated services (co-occurring services, mental health and substance use disorder treatment) at one location.

Objective #1: 98% of all SUD intakes will complete an AIMS questionnaire to determine need for services and further screening.

Objective #2: 17 clients will complete a mental health screening per month to determine if full assessment and enrollment is appropriate.

Objective #3: The AIMS program will provide individual mental health counseling to 17 clients per month and provide therapeutic groups if supported by need/requests.

Objective #4: 80% of the enrolled clients will engage in an AIMS services minimally 1 time per month.

Data Collection
